

**comparative study of smear microscopy, rapid slide culture ...** - rapid slide culture is a sensitive, economical, and rapid method for diagnosis. this method uses human blood medium and an incubation period of seven days. the method was successfully followed by jena et al[6]. this background study aimed to compare the sensitivity and specificity of microscopy, rapid slide culture, and lj culture **evaluation of rapid slide culture technique for the ...** - suitable method for rapid diagnosis of pulmonary tuberculosis in settings requiring minimal equipments and it can be a routine diagnostic procedure for diagnosis of pulmonary tuberculosis. the sensitivity and specificity of slide culture were higher than microscopy when compared with gold standard ogawa culture. **rapid, efficient detection and drug susceptibility testing ...** - rapid, efficient detection and drug susceptibility testing of ... tional culture methods, mycobacterium tuberculosis (mtb de- ... on a microscope slide and stained with 0.1% auramine o by standard procedures (9). slides were examined microscopically at 31000 magnification. a stain was **a rapid drug susceptibility test (dst) for detection of ...** - mycobacterium culture and drug susceptibility test because of ... simple and rapid method. in slide dst, 85 (94.44%) cases were found to have resistance to one or more drugs. resistance of inh was **maldi-tof ms for rapid identification of mycobacterium ...** - maldi-tof ms for rapid identification of mycobacterium species in liquid culture media submit ... maldi-tof ms for rapid identification of mycobacterium species in liquid culture media 106 ... and spinning at 4000g for 2 min. one 1/4 of the supernatant was spotted on a ms target slide and subjected to air-dry. the spot was overlaid with 1/4 of ... **new simple and rapid test for culture confirmation of ...** - new simple and rapid test for culture ... new simple and rapid test for culture confirmation of mycobacterium tuberculosis complex: a multicenter study ... that the mpb64-ica on a slide format could be easily used for rapid identification of the m. tuberculosis complex as a liquid **the rapid isolation mycobacterium tuberculosis and ...** - the rapid isolation of mycobacterium tuberculosis and the simultaneous streptomycin sensitivity determination by a. f. maccabe and j. c. gould ... slide culture in saponated blood (giammalvo, natsios, and elton, 1949) is more rapid, but the method is too laborious and requires considerable skill. **evaluation of multiple laboratory methods in the diagnosis ...** - results and conclusion: mycobacterium tuberculosis was isolated in 24.2%. ... rapid slide culture, when compared to the above methods, is rapid, simple, and affordable and the turnaround time for detection of m. tuberculosis is 7 days which proves it being more advantageous **recent advances in rapid laboratory diagnosis of tuberculosis** - recent advances in rapid laboratory diagnosis of tuberculosis dr. wc yam mrcpath (uk), phd (hk), fibms (uk), ... patients with subsequently culture positive for mycobacterium tuberculosis. although the sensitivity of ... automated polymerase chain reaction system for the rapid detection of mycobacterium tuberculosis in respiratory specimens **mycobacterial culture final - aphi home** - purpose of mycobacterial culture 4 detection of mycobacterium tuberculosis complex (mtbc) ... supports rapid and robust growth of small numbers of ... deposit drop of culture on glass slide, let dry in biological safety cabinet, fix, and **comparison of conventional methods with automation and ...** - culture, such as the rapid slide culture technique, bactec and card elisa test.7 robert koch was the first to use rapid slide culture technique using coagulated human serum, he was successful in obtaining the growth of mycobacterium bacilli in 7 days but contamination hindered further success. the rsc is a rapid, simple and safe method **international journal of health sciences and research** - rapid and sensitive but expensive. thus a new cheap, rapid and sensitive diagnostic method is required for eptb. rapid slide culture (rsc) could be fulfilling this requirement. so, in this study we focused on double culture method including liquid culture and rsc technique for early diagnosis of tuberculosis. **tuberculosis laboratory overview - michigan** - culture may be afb positive even if smear was reported negative for afb rapid broth testing "normally positive within 1-2 weeks. requires 6 weeks to report culture as negative positive culture result may be either mycobacterium tuberculosis complex or atypical mycobacterium **fast and accurate identification of m. tuberculosis ...** - firming mtb in culture isolates in resource limited laboratories. the study also

evaluated the abil- ... mgit (mycobacterium growth indicator tube), sd tb ag mpt64 rapid (standard diagnostics, seoul, south korea) 1. introduction tuberculosis (tb) is an infectious disease caused by the bacillus ... main on the slide for 5 minutes. after 5 ...
